Q12 £100

Step 1: £68 = 100% - 15% = 85% of the total price after the first promotion.

Step 2: 85% ÷ 17 = 5%, so 5% of the price after the first promotion = 68 ÷ 17 = £4.

So, 100% of price after first promotion = 5% x 20 = £4 x 20 = £80.

Step 3: £80 = 100% - 20% = 80% of the original price.

Step 4: 80% ÷ 80 = 1% of original price, so 1% of original price = £80 ÷ 80 = £1.

Therefore, original price = 1% x 100 = £1 x 100 = £100.

Q13 26 mm

Step 1: The range is the highest value minus the lowest value. Looking at the graph, we can work out these values as: 63 – 37 = 26 mm.
