Q5 Saturday. The storm found our campsite after dark, and all night the wind prowled around the tent. None of us slept until it finally gave up at dawn.

What is the effect of the word 'prowled' as it has been used above?

A. It suggests a wild animal was circling the tent all night.
B. It shows the storm passed over the campsite quickly and quietly.
C. It makes the wind seem like an animal hunting for a way in.
D. It tells us the tent was badly damaged during the night.

Q6 Read these lines from a poem:

One bar of light through the attic pane,
Dust sleeps on a box of photographs,
Each summer folded flat and kept,
I smile, and let them shine again.

What is the mood of these lines?

A. wistful
B. cheerful
C. lonely
D. eerie

Q4 A bag contains red, yellow and green counters. The ratio of red counters to yellow counters is 2 : 3, and one quarter of all the counters are green.

What fraction of the counters are yellow? Give your answer in its simplest form.

A. $\frac{9}{20}$

B. $\frac{3}{5}$

C. $\frac{3}{10}$

D. $\frac{1}{4}$

Q5 Suki threads beads onto a cord in a repeating pattern: red, blue, green, yellow, yellow, and then the pattern starts again.

What colour is the 78th bead?

A. red

B. yellow

C. blue

D. green

[redacted]

Q4 **A**, $\frac{9}{20}$

Step 1: One quarter of the counters are green, so the red and yellow counters together make $1 - \frac{1}{4} = \frac{3}{4}$ of the bag.

Step 2: Red and yellow counters are in the ratio 2 : 3, so the yellow counters are 3 parts out of every 5 in that group, which we can express as the fraction $\frac{3}{5}$.

Step 3: Therefore, number of yellow counters in the entire bag = $\frac{3}{5} \times \frac{3}{4} = \frac{9}{20}$, which is already in its simplest form.

Q5 **D**, green

Step 1: The pattern repeats every 5 beads, so divide: 78 ÷ 5 = 15 remainder 3.

Step 2: After 15 complete repeats, which use 75 beads, the 78th bead is the 3rd colour of the pattern. The third bead in the repeating pattern is green, so this must be our correct answer.
